# About Us

Terrco® Inc. was founded in 1936 by Peter Vinella under the name Terrazzo Machine and Supply Company Inc. In 1948 Peter's son Frank Vinella entered the business and in 1953 took control of the company. Frank's sons, James and Peter Vinella, entered the business in 1974 and 1978 respectively. In 1986 Terrco® Inc. was moved to Watertown, South Dakota where James Vinella was President until 2017 when Peter took control. Peter's son Frank Vinella entered the business in 2008 and took the position of Vice-President from Peter in 2017.

We began business by supplying our customers with the most productive and rugged floor grinding and polishing machines in the industry. Today we continue this tradition with the largest range of innovative Terrco® machines. We have all the machines and parts for your floor grinding and polishing needs. With engineers and machinists on staff, we can handle your toughest applications. Don't be fooled by cheap imitations, insist on the quality of a Terrco® machine.

Terrco® is a registered trademark of Terrco, Inc.

### ADJUSTABLE ROLLER GUARD

The adjustable roller guard was designed to handle a seven inch cup wheel. The rollers on the guard are adjustable to allow the user to choose how close to a wall to grind. The Terrco Edger equipped with the HBS-146 guard will keep you off your knees all while grinding cleanly right up to a wall.

# Dyes & Finishes

**Ameripolish® Concrete Dyes** - Terrco® Inc. is a distributor of Ameripolish® Concrete Dyes. Ameripolish dyes were created for use on polishing concrete but can be used as a base color or touch up that has received integral color, dry shake hardener, acid stains or as an overlay. The dyes were formulated from fine color molecules and designed to penetrate any cementitious surface.

**1 gallon container covers 400-600 sq. ft.**

**Edge Tint** - Edge Tint is a mixture of concrete dye and a proprietary acrylic blend. Apply Edge Tint to edges, footings, hard to reach areas or areas where you are unable to grind or polish.

**Two-part system covers 200-250 sq. ft. per gallon**

**Ameripolish® 3D HS (Hybrid Silicate) Densifier** - Improves surface performance and resists the harmful effects of traffic wear and weathering. By having 3 different size molecule silicates this product fully penetrates varying densities of concrete regardless of region or hardness. This improves the abrasion resistance for new or aged concrete. 3D HS is ideal for use for exposed and polished concrete, as well as cements with integral color.

**Ameripolish® 3D SP (Stain Protector)** - A breathable semi-penetrating/semitopical sealer that helps to protect surfaces against stains and etching. 3D SP creates a water-resistant barrier that prevents liquids from infiltrating the surface, protecting against staining and color dispersion.
